

KOAMTAC Social Distancing Feature

Helping You to Keep Your Entire Workforce Safer

The COVID-19 pandemic has added a new challenge to every workplace - warehouses, manufacturing lines, and even retail store floors - the need to maintain distance between people for their health and safety. Reopening your business is already an undertaking but ensuring social distance among your workers is made easy with the KOAMTAC social distancing feature.

Whether you're a small or enterprise business, the KOAMTAC social distancing feature works with the technology and systems you already have in place so you, and your workers, can have peace-of-mind as you adjust to the new normal.

Empower Workers with Audible and Visual Alerts

Put the power in each employees' hand with audible and visual social distance warning alerts. The KOAMTAC social distancing feature is ideal for accessibility and created to keep social distancing at the top of each employee's mind. These alerts allow workers to safely correct, adjust, and maintain social distance while minimizing disruption in their workflow.

Ensure Compliance with Automated Email Alerts

When a social distancing violation occurs, supervisors can be notified in real-time via email alert. These emails help identify recurrences the need to share information with employees regarding the importance of social distancing.

Track and Monitor Exposure via Dashboard

A holistic dashboard helps track potential exposures quickly. Use the dashboard to quickly identify the correct employees and efficiently take the next steps to ensuring everyone's health and safety.

Social Distancing Feature

Audible, Visual, and Tactile Alerts

Three different types of alerts on both the KDC and host device let users know they have come too close and need to adjust: an audible beep, on-screen warning notification, and vibration. The combination of alerts is ideal for accessibility and loud or low visibility work environments.

Adjustable Settings

To account for changes in social distance recommendations, we've enabled the adjustment of the social distance range per device. Set the range from 3.3' to 32.8' (1 m to 10 m) with a quick adjustment on the KDC.

Quick and Easy to Deploy

A simple firmware upgrade is all that's required to enable social distance proximity settings and alerts on all BLE 5.0 KDC devices. If your company has a Bluetooth classic KDC, we are happy to exchange for a BLE device to help ensure the safety of your workforce.

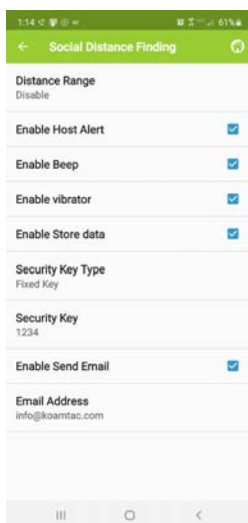

Works with All Operating Systems

BLE KDCs for barcode and RFID reading are available for use with Android and iOS mobile devices as well as Mac and Windows PCs. The KOAMTAC social distancing feature works with your existing technology - whatever it may be. The reliance on Bluetooth Low Energy means no additional infrastructure is needed - just connect the KDC to the host device and safety is secured.

Automated Employee Contact Tracing

When users receive proximity alerts, the connected host device also receives the information for comprehensive contact tracing. Managers can use this information to ensure workers maintain social distance and identify increased risk of exposure.

Supported KDC Devices

All Bluetooth Low Energy (BLE) 5.0 KDC devices are enabled with social distance alerts and contact tracing.

Companion BLE Devices:
KDC180 (all models)
KDC280 (all models)

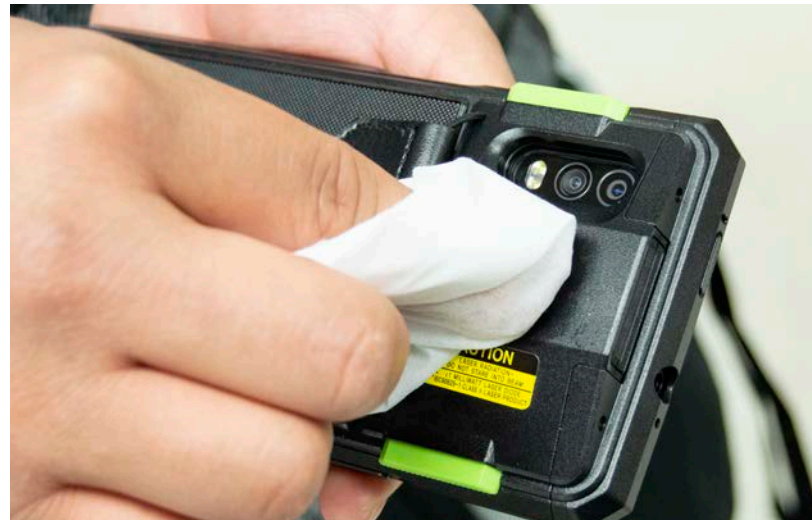

BLE SmartSleds:
KDC470-BLE (all models)
KDC475-BLE (all models)

Social Distance Proximity also compatible with all SmartSled companions including HF, 0.5W UHF, and 1.0W UHF

Maintain Good Hygiene with Shared Devices

Now, more than ever, it is important to maintain hygiene and sanitize your KDC devices and wearable accessories. Thorough disinfection of KDCs, phones, tablets, computers, and other electronic devices is essential for minimizing infection in both public and work spaces. Whether you work in a hospital, warehouse, delivery service, or any location utilizing a KDC or other mobile device, it is critical that you take care to ensure your device is clean. We highly recommend implementing a device cleaning regimen and policy for your company if there is not already one in place to help ensure everyone is properly disinfecting all devices on a routine basis. We've published guidelines and suggestions for ensuring cleanliness at [koamtac.com/maintaining-good-hygiene-with-your-kdc](https://www.koamtac.com/maintaining-good-hygiene-with-your-kdc)

Training and Support

Changing processes and work life sometimes requires guidance.

We have a support team available to help you with any questions or concerns you have during deployment and beyond.
